

1. Download solidworks alternate method from here
<https://alabama.box.com/s/fqf8aarzaloqayxieuhizy7t6rm8jxk>
2. Right click the solidworks 2021-2022 SP03-Student.zip and select "Extract all..."
3. Once extracted open the unzipped folder and find setup.exe, right click it and run as administrator
4. Once the file opens you will see a pop up notification from solidworks manager. Ignore it and click OK

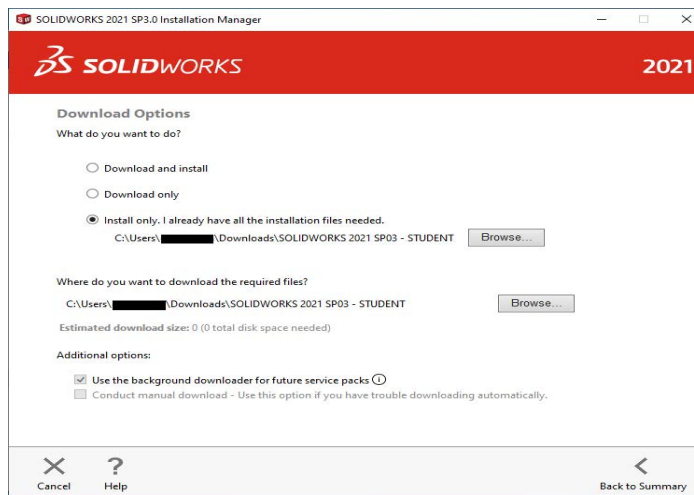

5. Next select install on this PC and click Next
6. Input the serial number found on <https://techwiki.eng.ua.edu/index.php/Solidworks> into the 3D Design section ONLY. This gives you the full suite with all other categories. Click Next

7. On the Summary page, click change next to products and uncheck Plastics and Electrical then click back to summary

8. Next click Change next to download options and select "Install only. I already have all the installation files needed." You may need to click the browse button and find the unzipped folder and select it as your target and then click okay. Then click Back to Summary

9. Click the box next to "I accept the terms of the SOLIDWORKS" Then click "Install Now"
10. Solidworks will begin installing and can take a very long time. Let it continue until it finishes. You will get a "Installation is Complete" Window, you can then click Finish and then it will ask you to restart your PC. Go ahead and click restart now.
